Transport Protocol For Cryonic Suspension Of Humans

by **Michael G. Darwin**

Fourth Edition

Contents copyright 1990 by Alcor Life Extension Foundation, Inc. except where otherwise noted. All rights reserved.

This manual is dedicated to Fred and Linda Chamberlain, the founders of Alcor and the authors of the first cryonic suspension training manual.

Their dedication, integrity and competence are a proud legacy of which I hope this work is worthy.

Acknowledgements

The author wishes to thank the following people for their assistance in reviewing this material and making many valuable suggestions as to its form and content: Stephen Bridge, M.L.S., Steve Harris, M.D., Hugh Hixon, M.S., Allen J. Lopp, Arthur McCombs, M.S., and Ralph Whelan.

I would especially like to thank Jerry D. Leaf for the opportunities working with him has provided me in acquiring the skills and insights necessary to write this manual. A special acknowledgment of gratitude and credit must also be extended to Jerry for developing much of the core protocol for transport which serves as the foundation for this work.
